Mouth Cancer Action Month

1st November to 30th November

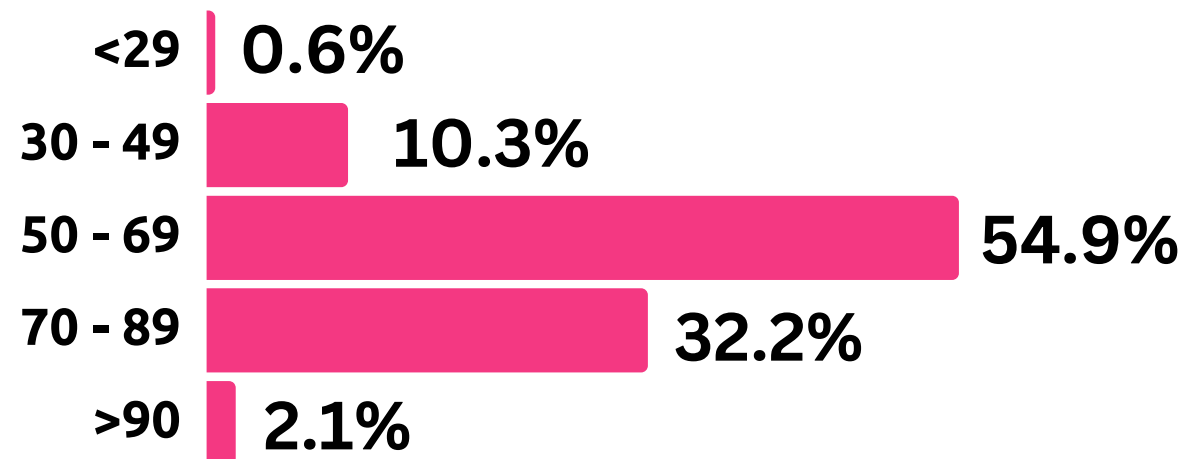

Mouth cancer is twice as common in men

Each year there are over 300 new cases of mouth cancer

Mouth cancer is more common in people over 50

The number of new cases of mouth cancer has been increasing each year since 2002

Mouth Cancer Action Month

1st November to 30th November

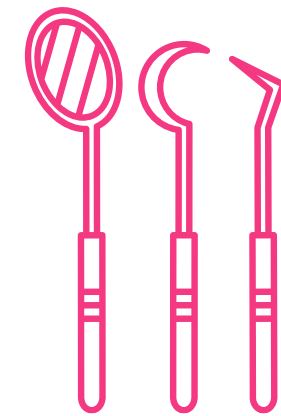

Early diagnosis is key to improve survival

Actions for healthboards and health professionals:

Improve public and healthcare professional awareness of mouth cancer

Advise people to see a dentist for regular check-ups even if they do not have any teeth

Provide effective brief interventions to people at risk

Ensure an urgent mouth cancer referral pathway exists
